**Attachments:** ND's Aquatic Life Criteria for Toxics Planning Survey.pdf

Dear Tonya:

Aaron and I responded. Found format frustrating.

Pete

EPA R8 has been asked by HQ to respond to the attached survey and include state/tribal input. Please respond to me with any feedback by COB July 9.

The Health and Ecological Criteria Division in the beginning stages of planning a series of workshops on Aquatic Life and Aquatic-Dependent Wildlife Ambient Water Quality Criteria for Toxics. The purpose of the workshops is to reach out to the Regions, states and tribes on aquatic life criteria to improve our connections and common understanding. They currently plan for the workshops to include EPA presentations on Aquatic Life Criteria efforts, including recently developed criteria, as well as regional, state and tribal partner presentations on their experience with criteria development or particular criteria issues of interest. They are not going to focus on criteria implementation issues.

Thank you for your time,  
Tonya
